

**Our Remote Solutions
will take you further.
Much further!**

www.ewon.biz

eWON® Remote Solutions are designed for major PLC brands and field protocols. incl. legacy models.

+ many more...

Your security is our priority!

Layered security approach

- Policy compliance 
- Network infrastructure 
- User and access management 
- Traffic encryption 
- Firewall 
- eWON device 

eWON ensures high security using the “Layered security approach” also called “Defense in Depth Approach”. This approach preserves information integrity, confidentiality along with information system availability and resiliency.

eWON REMOTE SOLUTIONS

As the world leader in the Internet-based remote access area, eWON offers four solutions which have been built and optimized throughout more than 15 years experience.

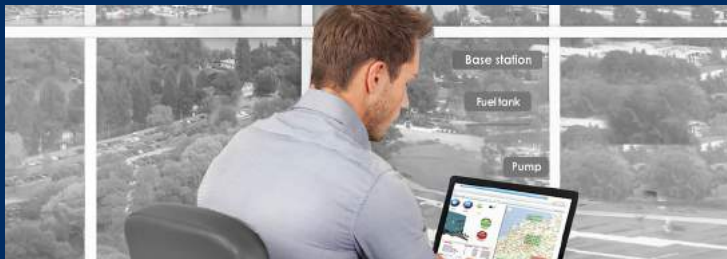

Let us take your business further and guide you **from remote access to a far greater connected industrial world!**

REMOTE ACCESS

REMOTE DATA

REMOTE MANAGEMENT

REMOTE NETWORKS

REMOTE ACCESS

Stop traveling on site for support!

Today, every machine builder recognizes the need to remotely access its machines and equipment in the field in order to **drastically reduce maintenance costs and optimize customers machine uptime.**

Remote Access allows you to:

- Troubleshoot and program PLCs remotely
- View and control your remote HMIs
- Connect to a web camera for assistance
- Support field technicians for commissioning

Why eWON Remote Access?

- Turnkey solution with **free** connectivity
- Recommended by PLC vendors
- Worldwide infrastructure & coverage
- Compatible with automation devices (incl. legacy)
- High customer & IT acceptance
- Connect anywhere on any device

For more info, please read the **eWON Cosy brochure** or visit www.ewon.biz/cosy.

REMOTE DATA

Unlock new services with your machine data.

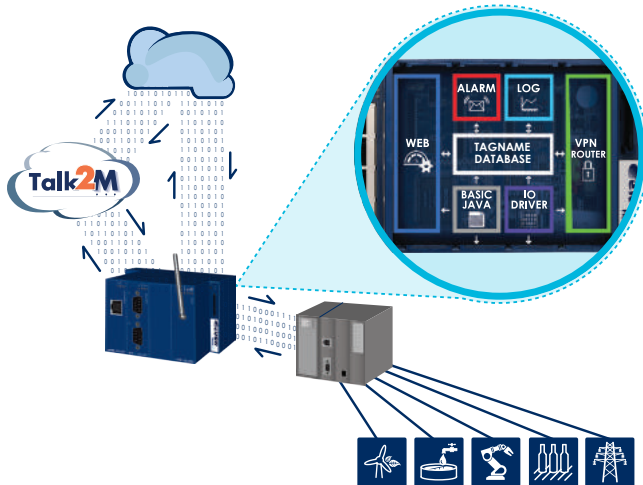

In addition to Remote Access, Remote Data provides advanced data services including data collection from remote sites and alarm management. This solution makes **performance monitoring and proactive maintenance** possible.

Remote Data allows you to:

- Gather time stamped machine data centrally (alarms, KPI, set point, consumption, ...)
- Use or create your own remote HMI
- Collect data from the field to create added-value services
- Access your machines remotely

Why eWON Remote Data?

- All major protocols embedded (incl. legacy) for data acquisition
- Open and easy for third-party integration
- Multiple ways to acquire data
- Capability of storing up to 1 million data points locally

For more info, please read the **eWON Flexy brochure** or visit www.ewon.biz/flexy.

REMOTE MANAGEMENT

Optimize the operational efficiency of your assets.

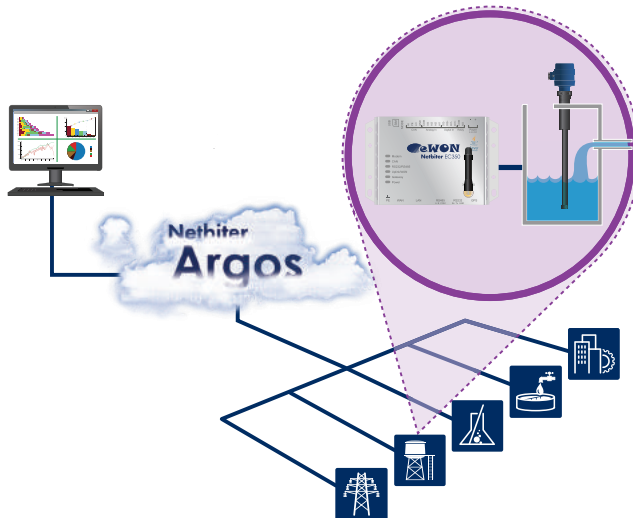

Remote Management is a turnkey solution designed for end-users/facility managers to monitor and control their industrial assets online and therefore allowing to **make better operational decisions faster.**

Remote Management allows you to:

- Manage multiple sites, equipment and users
- Visualize data from remote installations
- Manage alarms and events
- Analyze trends and performance

Why eWON Remote Management?

- Turnkey solution
- No IT skills needed
- View and track your assets (GPS)
- Quick deployment
- Create and design your dashboards in no-time

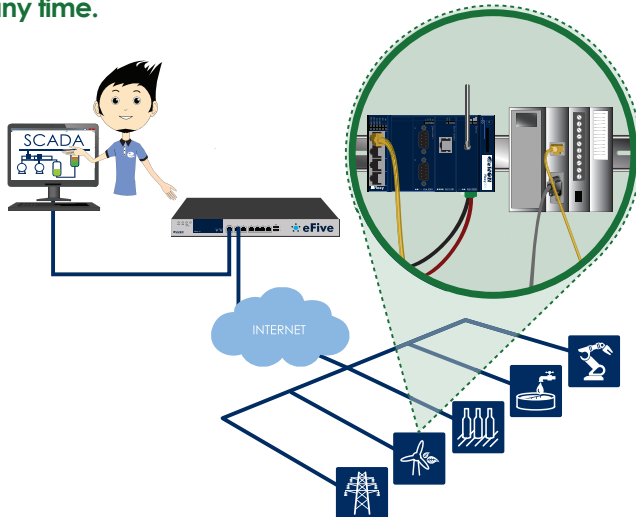

For more info, please read the **eWON Netbiter brochure** or visit www.ewon.biz/netbiter.

REMOTE NETWORKS

**Connect your SCADA
to your remote sites.**

This solution allows system integrators to establish secure industrial networks linking multiple remote sites to central control rooms through permanent VPN connections. Benefit from a **seamless access to your remote sites data at any time.**

Remote Networks solution allows you to:

- Quickly set up a VPN-based extranet network
- Replace your legacy modem or radio solution and benefit from the reliability of the Internet connectivity
- Interface your PLCs to your SCADA/supervision system

Why eWON Remote Networks?

- Compatible with any PLC including legacy models
- Local data buffering in case of communication loss
- Various connectivity options

For more info, please read the **eWON eFive brochure** or visit www.ewon.biz/eFive.
